COURSE OBJECTIVES

The Innovation and Clarity in Long Term Care Conference is an inaugural education event that is jointly planned by the WRHA Long Term Care Program (LTC) and CPD Medicine. It will provide a full day of education in 7 key areas relevant to LTC: behaviours in dementia, deprescribing, wound care, the dementia journey, end-of-life care and resident transfers. The target audience is health-care professionals working in long-term care, personal care homes, geriatrics or with older adults, including physicians, nurse practitioners, nurses, physician assistants, pharmacists and other allied health professionals.

AT THE CONCLUSION OF THIS EDUCATIONAL ACTIVITY, THE PARTICIPANT SHOULD BE ABLE TO:

- Apply the relevant and timely information provided for physicians, nurse practitioners, physician assistants, pharmacists, nurses, and other allied health professionals working in LTC.
- Effectively address common issues in long term care (e.g. wound care) and “think outside the box” to look at innovative strategies in managing new or challenging issues in long-term care.

CanMEDS ROLES

Medical Expert | As Medical Experts, physicians integrate all of the CanMEDS Roles, applying medical knowledge, clinical skills, and professional attitudes in their provision of patient-centered care. Medical Expert is the central physician Role in the CanMEDS framework.

Communicator | As Communicators, physicians effectively facilitate the doctor-patient relationship and the dynamic exchanges that occur before, during, and after the medical encounter.

Health Advocate | As Health Advocates, physicians responsibly use their expertise and influence to advance the health and well-being of individual patients, communities, and populations.

Scholar | As Scholars, physicians demonstrate a lifelong commitment to reflective learning as well as the creation, dissemination, application and translation of medical knowledge.
